

Connecting to T-Mobile Wireless Hotspot via an Android Device

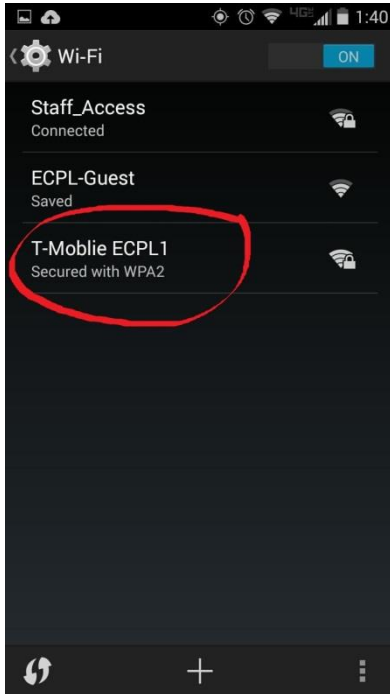

1. Access your settings application.

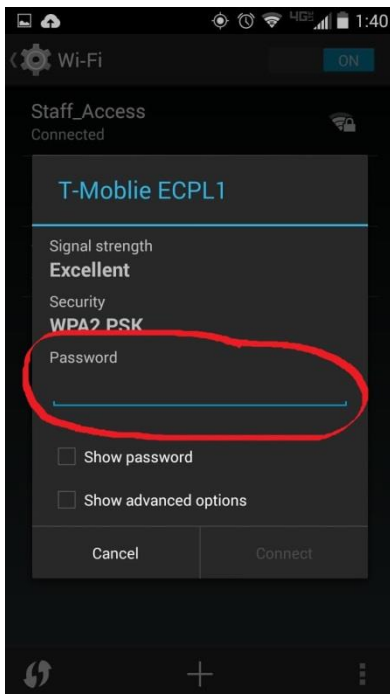

2. Press the Wi-Fi option.

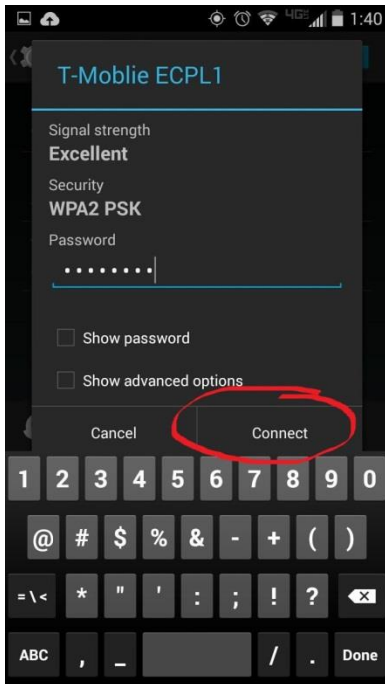

3. Available wireless networks to connect to will appear, and this includes the T-Mobile Wireless Hotspot (if it is turned on). It should be named “T-Mobile ECPL#”. Press on it to select it.

4. Enter the password for the given device.

5. Once you have entered eight characters, select the “Connect” option at the bottom of the screen.

6. If you entered the password correctly, your Android device should connect to the wireless hotspot. Under the hotspot device name on the screen, it will display “Connected”.
