

Connecting to a T-Mobile Wireless Hotspot via Windows Laptop

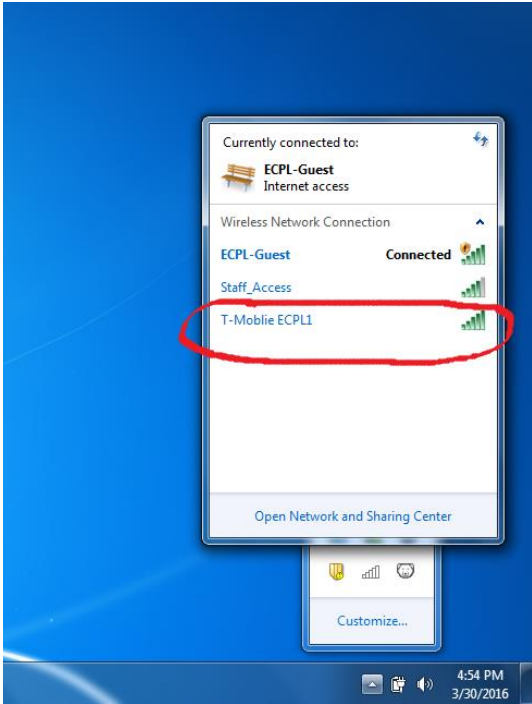

1. Click the “Show Hidden Icons” arrow in the bottom, right corner of your desktop.

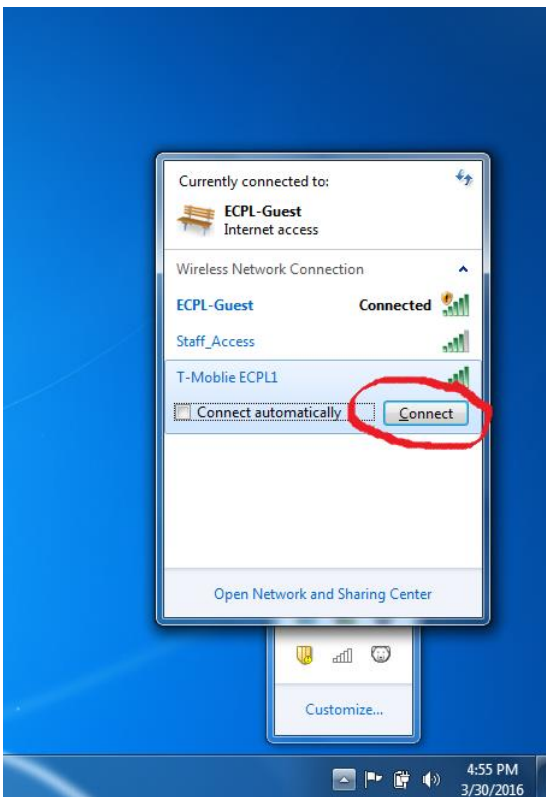

2. Click on the “Wireless” icon as shown in the image below.

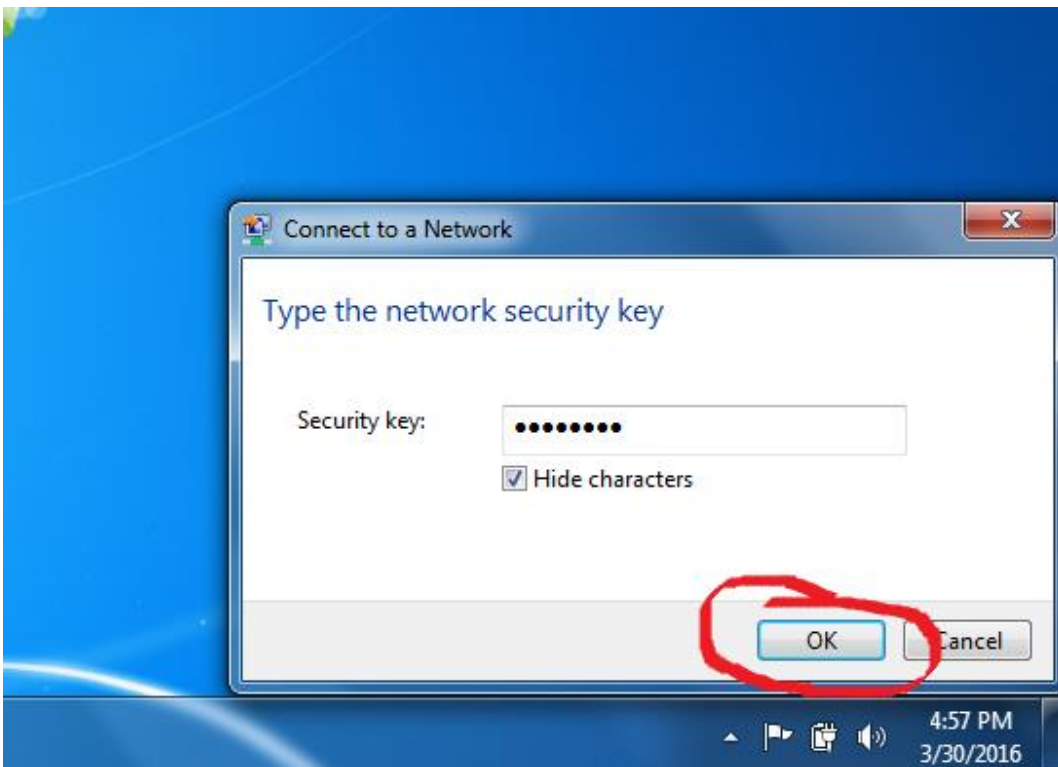

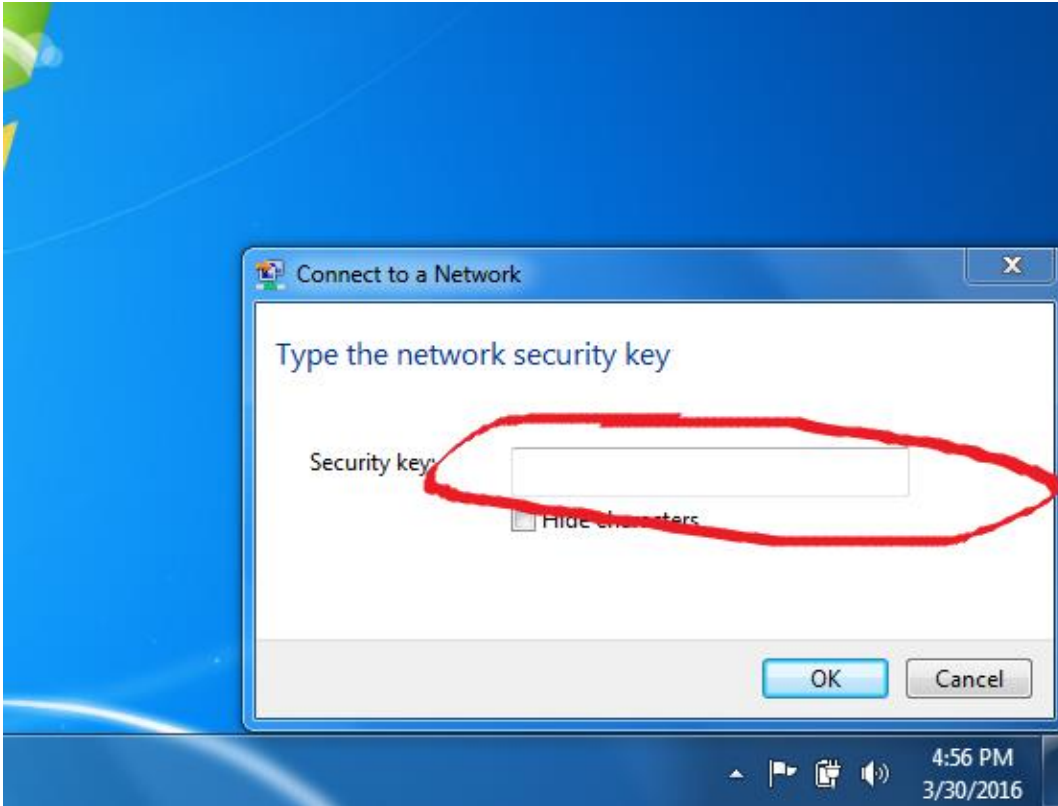

3. A wireless connection named “T-Mobile ECPL#” should appear. Click on it.

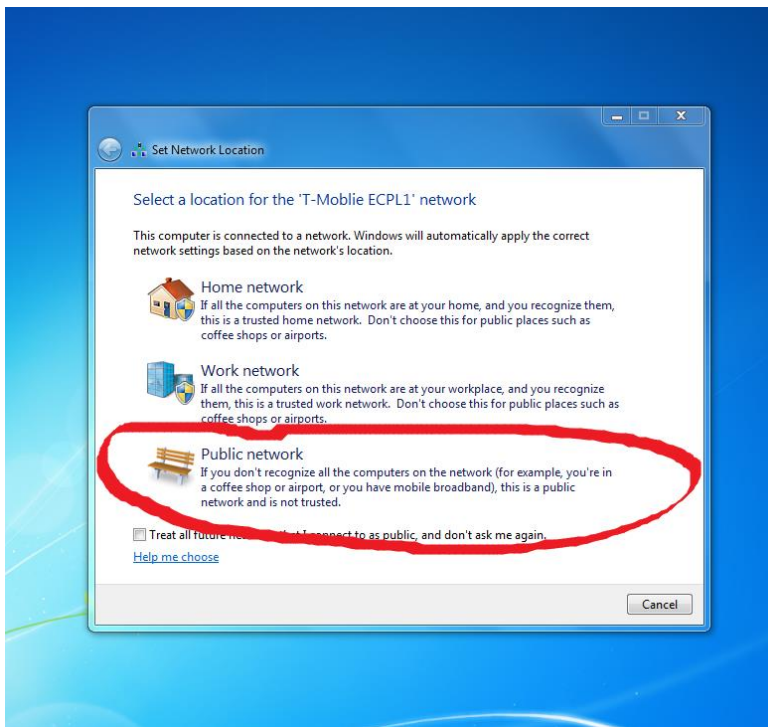

4. Click “Connect”.

5. Enter the password for that given device and click OK.

- A location option window for the network will appear. Select the “Public network” option by default.

- Click Close, and you should now be connected to the wireless hotspot.
